

New for summer 2016 - Reduced visit fees for zoned visits.

Over the last few months we have been concentrating on providing our clients with more cost effective solutions for their horses routine healthcare and have introduced a number of reduced cost offers for vaccinations, routine examinations and routine dental treatment. For summer 2016 we are extending this drive by introducing reduced cost "zoned visits" in addition to the existing summer offers.

We will be offering regular zoned visits on preset days in each area of the practice. The "zones" covered will be:

- The north of the practice centred on Cullompton. Monday.
- The south of the practice centred on Newton Abbot and extending down into the South Hams. Tuesday.
- The West of the practice along the A30 including Okehampton, Launceston and Holsworthy. Thursday.
- The central practice area and east Devon. Friday.
- Crediton, mid Devon and an area centred on South Molton. Tuesday morning and Friday afternoon.

These zoned visits will be charged at half of our (already reduced) visit fee at £12.50 plus VAT and will be subject to a few conditions as follows:

- The visits will be for routine healthcare procedures (vaccination, prescription check ups and dental treatment) and routine examinations. They will not normally be available for more specialist, prolonged or involved examinations.
- The visits will need to be booked in advance.
- A designated vet will carry out all the routine visits in each zone on each occasion so unfortunately it will not be possible to choose which vet visits you (it will still be possible to book a normal visit with a specified vet if required as before).
- We will do our best to book a visit time that is convenient to you, but it may not be possible for you to specify a certain visit time because of the need to accommodate all clients in an area.
- We ask that your account with the practice is up to date before you take advantage of these reduced price zoned visits.

In addition to these zoned visit offers, our existing offers for routine healthcare treatment continue to be available:

- Reduced prices for multiple vaccinations or dental treatments on one yard.
- Reduced prices for dental treatments carried out at the same time as vaccination.
- Low cost health checks at vaccination which include a free worm egg count.

For further information on "zone visits" and our other offers on routine healthcare, please contact the practice and speak to Claire or Zoe.
